

200/02444 A01

### REMARKS

The present application is a U.S. national application of PCT Application No. PCT/IL00/00239 filed April 24, 2000. The claims in the present application were amended by removing multiple dependencies, to reduce costs and put them in better form for examination in the US.

Applicants wish to bring to the attention of the Examiner that the present amendments are based on claims 1-25 as originally filed.

A marked-up set of the amended claims is attached hereto.

An examination on the merits is respectfully requested.

Respectfully submitted,  
Aviad HELLMAN, et al.

**Marked-Up Version of Amendments**

4. (Amended) A surveillance unit according to claim 1 ~~any of claims 1-3~~, wherein the control circuitry determines when the digital camera should capture images.

5. (Amended) A surveillance unit according to claim 1 ~~any of claims 1-4~~, wherein the control circuitry performs the determination responsive to video motion detection (VMD) performed on images captured by the camera.

6. (Amended) A surveillance unit according to claim 1 ~~any of the preceding claims~~, wherein the control circuitry comprises a processor which receives the signals from the at least one detector and determines whether to store the captured images.

9. (Amended) A surveillance unit according to claim 7 ~~or claim 8~~, wherein the operational data comprises a software routine run by the processor.

10. (Amended) A surveillance unit according to claim 7 ~~any of claims 7-9~~, wherein the operational data comprises one or more operation parameters of the surveillance unit.

12. (Amended) A surveillance unit according to claim 10 ~~or claim 11~~, wherein the one or more operation parameters comprise at least one parameter which governs the level of indications required from the at least one detector to define an alarm state in which images from the camera are permanently stored.

13. (Amended) A surveillance unit according to claim 1 ~~any of the preceding claims~~, comprising a communication link for transmitting at least some of the images captured by the camera.

16. (Amended) A surveillance unit according to claim 1 ~~any of the preceding claims~~, wherein the control circuitry stores a log of events on the memory card.

17. (Amended) A surveillance unit according to claim 1 ~~any of the preceding claims~~, comprising an internal image memory for storing images captured by the camera.

23. (~~Amended~~) A method according to claim 19 ~~any of claims 19-22~~, wherein the operational data comprises a software which runs on a processor of the surveillance unit.

24. (~~Amended~~) A method according to claim 19 ~~any of claims 19-23~~, wherein the operational data comprises one or more operational parameters of the surveillance unit.

25. (~~Amended~~) A method according to claim 19 ~~any of claims 19-24~~, comprising storing images captured by a camera of the surveillance unit on the memory card inserted to the surveillance unit.
